

Efficient Programming - IM in a Group Therapy Setting

Course Description:

The purpose of this course is to outline strategies for implementing an IM group therapy program. This webinar will describe one successful pediatric group therapy program and discuss various ways to adapt this concept for other clinics and populations. This presentation will focus on identifying key components to successful group programming, including identifying appropriate patients, writing programming objectives, and selecting appropriate treatment activity ideas.

***Contact hours are offered pending successful completion of a written exam at the end of the course.**

***Note: This course covers information that pertains to licensed therapists and therapy assistants. SLPA professionals must practice IM under the supervision of a licensed SLP.**

Instructors:

Kelly Grabdike, OTR/L received her undergraduate and master's degrees from The University of Kansas. She initiated her pediatric training during an internship in Perth, Australia and has been working as a pediatric occupational therapist at Children's Mercy Hospital and Clinics in Kansas City, Missouri since her graduation in 2007. Kelly works with both inpatient and outpatient populations and incorporates the Interactive Metronome into both settings. Her primary clientele include children with neurologic injuries such as CVA, TBI, and SCI, as well as children with developmental delay, ADHD, autism, trauma histories, and sensory processing disorders. She works as part of a multi-disciplinary team at the hospital who address their client's needs from a holistic perspective and assure a well-rounded treatment approach.

Disclosure:

The Interactive Metronome, Inc. has developed and patented a licensed technology trademarked as the Interactive Metronome®. (U.S. Patents #4,919,030; #5,529,498; #5,743,744; #6,719,690; other U.S. and foreign patents pending) Interactive Metronome, Inc. is the sole source of the following products: Interactive Metronome®, Gait Mate® and IM Home®.
